Ray

Please advise when you will have the presentation available for our review prior to the meeting.
Thanks. Debbie

That is fine then to not present the sampling data and just focus on the modeling work. We thought it might be helpful though to provide a general overview of the sampling work and the status. Are you planning on presenting any risk assessment results?

Our plan is to have you guys up near the front of the agenda when we are providing general updates on activities. Folks will want to know what you have been up to. A final

agenda will be circulated shortly. Please plan on 15-20 minutes for your presentation and Q&A. Thanks, Debbie

Hi Debbie will do. We are working on it now. FYI we checked with EPA and they prefer that we not get into the most recent data on the 14th so that will have to wait for another time ok. Talk to you soon.

We would like to see the presentation in advance of the meeting next Thursday? Is that possible? Thanks, Debbie

Hi Debbie. I have conferred with the technical team and I can assure you that the CPG has a lot of new information to share with the CAG. As of our last presentation, we had not yet completed any modeling runs. We have now completed several and can elaborate on those results. In addition, there is new sampling information available for areas above and below RM 8. The only question is whether all the upriver data will be through quality control by the 14th. If not, the folks at the EPA would need to determine whether it could be shared with the CAG. Any further questions please let me know. Thanks.

So, will there be any new information from the last presentation? It seems that CPG has been saying that it has been doing this sampling and modeling for a while, but we have not seen any results. If there is nothing new, then it probably makes sense to wait.

Ray

My notes indicate that the CPG was undertaken additional sampling upriver as well as some modeling work. We would appreciate an update on that. Thanks, Debbie

Hi Ray, Rob,

The CAG is putting together its plan for reviewing and discussing the FFS and proposed plan as they are released. Last we chatted with the CPG, you guys were doing your own modeling work to refine your proposal. Can you please provide an update of the status of your work and what timing makes sense for the CPG to present an update of its work at a CAG meeting.

thanks
